EDUCATION

Master of Science in Engineering in Artificial Intelligence, 2026 – 2028 | Online
UNIVERSITY OF PENNSYLVANIA

Bachelor of Science in Data Science, 2021 – 2025
UNIVERSITY OF CALIFORNIA, RIVERSIDE

SKILLS

Languages: Python, SQL, C++, R, JavaScript, HTML, CSS

Tools: Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow, Tableau, BigQuery, React, Node.js, Express, MongoDB, Git/GitHub, Selenium, BeautifulSoup, MSSQL, LangChain, OpenAI API, Claude API, Google ADK, ChromaDB, Streamlit

Core Skills: AI Systems and LLM Applications, RAG Systems, Multi-Agent Systems, Machine Learning, NLP, Data Analysis & Visualization, Statistical Analysis, A/B Testing, Software Architecture, Human-Centered Design

CERTIFICATES

- AWS Certified Cloud Practitioner 
- Google Cloud: BigQuery for Machine Learning 
- Databricks: Generative AI Fundamentals 
- IBM: Develop Generative AI Applications 

WORK EXPERIENCE

FIVE10x , *Technical Contractor - Product Development* 01/2024 – Present | Remote, CA

- Built an NL2SQL chatbot using OpenAI API, Node.js, React, and MSSQL that converts natural language questions into SQL queries, enabling non-technical users to explore databases without writing SQL.
- Built ML models and text embeddings to analyze 50,000+ customer interactions from movie industry marketing campaigns, identifying sentiment and behavioral drivers and boosting audience awareness from 20% to 45%
- Built a full stack internal bug tracking and ticketing system with three user portals using Node.js, Express, Google Sheets API, and Google Drive API, deployed on Railway with GitHub CI/CD.

UCR INFORMATION TECHNOLOGY SOLUTIONS , *AI Intern* 06/2025 – 08/2025 | Riverside, CA

- Built a multi-agent Schedule Recommender with Google ADK, RAG, and BigQuery to create personalized student class schedules across 10+ majors.
- Developed backend logic to query course data, apply prerequisite rules, and support major specific scheduling agents.
- Designed a chat style calendar interface in AI Studio to enhance academic planning and user experience for students.

UCR COMPUTER SCIENCE DEPT. , *Data Science Research Assistant* 03/2025 – 07/2025 | Riverside, CA

- Built and preprocessed a 14K+ C++ code dataset including 9,248 student submissions and 2,980 AI-generated samples from Gemini 2.5 Pro and GPT-4o.
- Evaluated ML models (RF, XGBoost, SVM, MLP) and supported development of a Soft Voting Ensemble achieving F1 = 0.995 while remaining robust under 15% noisy data to detect AI-generated code.
- Contributed to dataset labeling, feature pipelines, and experiments for a SIGCSE 2026 publication.

EDIFecs, *Data Science Intern* 06/2024 – 08/2024 | Bellevue, WA

- Developed an internal LLM-powered chatbot using Llama 3, Ollama, and ChromaDB with a Streamlit UI, enabling engineers to query documentation and understand 11+ Edifecs products more efficiently.
- Refined NLP annotators using SQL and Regex in UIMA to accurately extract data from system-generated documents.

PILABS , *Data Science Intern* 06/2023 – 08/2023 | Riverside, CA

- Contributed to an DS PATH (NSF-funded) medical NLP research project, scraping 100,000+ medical concepts from UMLS and public sources using Python, BeautifulSoup, and Selenium to support semantic modeling.
- Improved model coverage and performance by integrating diverse data sources for broader term matching and relationship scoring.

PROJECTS

Drive Dashboard  04/2026 – 05/2026

- Built a single file web app using JavaScript and Google Drive API v3 that visualizes Drive files, permissions, and sharing settings with two phase loading and incremental sync via the Drive Changes API.
- Built with client side filtering, sorting, and search running entirely in memory with no server or database needed.

FINWISE - Personal Financial Dashboard 01/2025 – 03/2025

- Built a full-stack dashboard with React, Express, and MongoDB to manage budgets, transactions, and reports.
- Added authentication, backend APIs, and CSV export for user insights.
